This is not a manual that can be read as book, put on the shelf and the building started. It is an on-site reference work intended to be open on the job. The book is written in a cumulative style. That is, it is necessary to start at the beginning and gain knowledge as the book and the building project progresses. For anyone with a dream to build a log house or have one built professionally, it is a must. It serves to instruct, inspire and make the reader knowledgeable about log construction at every level.

For the professional builder or proprietor who already knows most of what this book teaches, the book would be useful for apprentices and other newcomers to the craft. It would also serve well to pass on to prospective customers to both inspire them further and to bring them up to speed on the language and concepts of log building.
