The second of five books in the groundbreaking new series *The Human Equation Toolkit*.

In Book 1 of The Human Equation Toolkit series, mime Wayne Constantineau and scholar Eric McLuhan explore the four positions of humans -- standing, lying down, sitting, and kneeling -- as the basis of all developments in culture, science, activity, and media. Now, in Book 2 of the series, they "do the math," giving us a generic equation for reconciling pairs of opposites by emphasizing differences, and for unifying diverse elements by stressing sameness -- creating a tool for investigating and transcending human development.
