Computational and Statistical Methods for Protein Quantification by Mass Spectrometry Ingvar Eidhammer, Harald Barsnes, Geir Egil Eide, Lennart Martens

The definitive introduction to data analysis in quantitative proteomics

This book provides all the necessary knowledge about mass spectrometry based proteomics methods and computational and statistical approaches to pursue the planning, design and analysis of quantitative proteomics experiments. The author's carefully constructed approach allows readers to easily make the transition into the field of quantitative proteomics. Through detailed descriptions of wet-lab methods, computational approaches and statistical tools, this book covers the full scope of a quantitative experiment, allowing readers to acquire new knowledge as well as acting as a useful reference work for more advanced readers.

Computational and Statistical Methods for Protein Quantification by Mass Spectrometry:

- Introduces the use of mass spectrometry in protein quantification and how the bioinformatics challenges in this field can be solved using statistical methods and various software programs.
- Is illustrated by a large number of figures and examples as well as numerous exercises.
- Provides both clear and rigorous descriptions of methods and approaches.
- Is thoroughly indexed and cross-referenced, combining the strengths of a text book with the utility of a reference work.
- Features detailed discussions of both wet-lab approaches and statistical and computational methods.

With clear and thorough descriptions of the various methods and approaches, this book is accessible to biologists, informaticians, and statisticians alike and is aimed at readers across the academic spectrum, from advanced undergraduate students to post doctorates entering the field.

From reader reviews:

Joseph McNeal:

What do you concentrate on book? It is just for students as they are still students or that for all people in the world, exactly what the best subject for that? Just simply you can be answered for that issue above. Every person has diverse personality and hobby per other. Don't to be forced someone or something that they don't would like do that. You must know how great as well as important the book Computational and Statistical Methods for Protein Quantification by Mass Spectrometry. All type of book could you see on many options. You can look for the internet resources or other social media.

Jeff Sanchez:

People live in this new day time of lifestyle always try to and must have the extra time or they will get large amount of stress from both day to day life and work. So , when we ask do people have free time, we will say absolutely sure. People is human not really a huge robot. Then we request again, what kind of activity do you have when the spare time coming to a person of course your answer may unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative inside spending your spare time, often the book you have read will be Computational and Statistical Methods for Protein Quantification by Mass Spectrometry.

Ladonna Warren:

Computational and Statistical Methods for Protein Quantification by Mass Spectrometry can be one of your beginning books that are good idea. We all recommend that straight away because this guide has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining but nonetheless delivering the information. The article author giving his/her effort to place every word into satisfaction arrangement in writing Computational and Statistical Methods for Protein Quantification by Mass Spectrometry however doesn't forget the main position, giving the reader the hottest and based confirm resource info that maybe you can be certainly one of it. This great information can easily drawn you into completely new stage of crucial thinking.

Laura Dumas:

As a pupil exactly feel bored to be able to reading. If their teacher asked them to go to the library or to make summary for some book, they are complained. Just very little students that has reading's internal or real their interest. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that examining is not important, boring along with can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Computational and Statistical Methods for Protein Quantification by Mass Spectrometry can make you feel more interested to read.
