Cold War III: How the U.S. Navy Can Defeat Putin and Halt Climate Change W. Craig Reed

"W. Craig Reed's non-fiction book, Cold War III, exposes Vladimir Putin's frightening plan to dominate world resources, and why the U.S. Navy may be our only hope to stop him and mitigate climate change at the same time."

--MALCOLM BOYES

Human population is skyrocketing, natural resources are dwindling, Russian aggressions are escalating, and Arctic climate changes are forging a new Cold War battleground that's about to turn hot. These alarming world events have converged to create a "perfect storm" that's thrusting the world toward unprecedented economic chaos and global conflict. In Cold War III, W. Craig Reed exposes Russian President Vladimir Putin's plan to dominate world resources, especially in the Arctic, and why the invasion of Ukraine is only the beginning. Reed also reveals details about a scientific breakthrough by the U.S. Navy that could defeat Putin, create jobs, and mitigate climate change. But unless world leaders act now, Putin's plan could plunge the free world into a nightmare scenario of poverty, despair, and chaos not seen since the Great Depression. Reed's previous non-fiction book, Red November, exposed shocking details about a top secret U.S. Navy technology, deployed worldwide by Reed's father, that allowed President John F. Kennedy to avoid World War III and trump Soviet President Nikita Khrushchev during the Cuban Missile Crisis. Reed's frightening revelations in Cold War III remind us that the world's superpowers are still bitter enemies, and the third Cold War is heating up rapidly deep beneath the Arctic ice.
