Charles Darwin

The Origin of Species and the Voyage of the Beagle (Vintage Classics) Charles Darwin
WITH AN INTRODUCTION BY DARWIN'S GREAT-GREAT-GRANDDAUGHTER, RUTH PADEL

When the eminent naturalist Charles Darwin returned from South America on board the H.M.S *Beagle* in 1836, he brought with him the notes and evidence which would form the basis of his landmark theory of evolution of species by a process of natural selection. This theory, published as *The Origin of Species* in 1859, is the basis of modern biology and the concept of biodiversity. It also sparked a fierce scientific, religious and philosophical debate which still continues today.
