A-GPS: Assisted GPS, GNSS, and SBAS Frank van Diggelen

Assisted GPS (A-GPS) has been developed to provide greatly improved capabilities, helping GPS work better and faster in almost any location. Offering a detailed look at all the technical aspects and underpinnings of A-GPS, this unique book places emphasis on practical implementation. The book reviews standard GPS design, helping you understand why GPS requires assistance in the first place. You discover how A-GPS enables the computing of a position from navigation satellites in the absence of precise time a topic not covered in any other book.

Moreover, you learn how to design and analyze a high sensitivity GPS receiver and determine the achievable sensitivity. The book provides detailed worksheets that show how to compute, analyze, and improve the processing gain from the input signal at the antenna to the signal after the correlators. These worksheets are used in the book to generate families of curves that completely characterize receiver sensitivity, parameterized in terms of front end noise figure, coherent and noncoherent integration times. From this work a law of achievable sensitivity is derived and explained in the book.

This cutting-edge volume discusses special forms of assistance data, industry standards for A-GPS, and government mandates for location of mobile phones. You also find coverage of future global navigation satellite systems and how they can be designed specifically for instant-fixes and high sensitivity. The book features numerous tables, worksheets, and graphs that illustrate key topics and provide the equivalent of a technical handbook for engineers who design or use A-GPS.

From reader reviews:

Harold Cole:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Make an effort to pick one book that you find out the inside because don't ascertain book by its protect may doesn't work this is difficult job because you are afraid that the inside maybe not since fantastic as in the outside look likes. Maybe you answer could be A-GPS: Assisted GPS, GNSS, and SBAS why because the fantastic cover that make you consider about the content will not disappoint anyone. The inside or content is definitely fantastic as the outside or even cover. Your reading 6th sense will directly guide you to pick up this book.

Charles Montiel:

This A-GPS: Assisted GPS, GNSS, and SBAS is great publication for you because the content which can be full of information for you who all always deal with world and have to make decision every minute. This particular book reveal it data accurately using great organize word or we can declare no rambling sentences inside. So if you are read that hurriedly you can have whole info in it. Doesn't mean it only provides straight forward sentences but hard core information with wonderful delivering sentences. Having A-GPS: Assisted GPS, GNSS, and SBAS in your hand like obtaining the world in your arm, info in it is not ridiculous one particular. We can say that no publication that offer you world with ten or fifteen small right but this e-book already do that. So , this is good reading book. Hey Mr. and Mrs. stressful do you still doubt that?

Lucille Daulton:

Publication is one of source of understanding. We can add our understanding from it. Not only for students and also native or citizen require book to know the upgrade information of year to help year. As we know those textbooks have many advantages. Beside most of us add our knowledge, can also bring us to around the world. Through the book A-GPS: Assisted GPS, GNSS, and SBAS we can consider more advantage. Don't someone to be creative people? For being creative person must want to read a book. Just choose the best book that suited with your aim. Don't be doubt to change your life at this book A-GPS: Assisted GPS, GNSS, and SBAS. You can more attractive than now.

Scott Reisinger:

Reading a guide make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is created or printed or created from each source which filled update of news. In this particular modern era like currently, many ways to get information are available for an individual. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just seeking the A-GPS: Assisted GPS, GNSS, and SBAS when you essential it?
