This practical, clinically oriented reference provides the veterinarian with all the relevant clinical pharmacology information needed when selecting drug regimes for pets. It compiles easy-to-find data on dosages, routes of administration, formulation, metabolism, side effects, interactions, special considerations, and more, all in one convenient volume. Information on each drug class is presented in a consistent format, making it easy to locate key information. Chapters on all the main drug classes are complemented by additional chapters on key body systems, as well as introductory chapters on pharmacokinetics and pharmacological principles.
