Molecular Biology in Cellular Pathology

The latest edition of this highly successful text, covers the major advances in the methods used in cellular and molecular pathology. In recent years, knowledge of the molecular organization of the cell has led to the development of powerful new techniques that bring greater accuracy and objectivity to the diagnosis, prognosis and management of many diseases and to the study of pathological states. This book describes the latest molecular techniques available for the analysis of diseases. In particular it includes new techniques using fluorescent dyes, DNA microarrays, protein chemistry, and mass spectrometry. It also incorporates information from the Human Genome Project, and the new disciplines of genomics and proteomics, where relevant to pathology. Color plates are a new feature of this edition, illustrating the advances in fluorescence labeling of cells.
