**Semantic Web-based Intelligent Geospatial Web Services (SpringerBriefs in Computer Science)** Peng Yue

By introducing Semantic Web technologies into geospatial Web services, this book addresses the semantic description of geospatial data and standards-based Web services, discovery of geospatial data and services, and generation of composite services. Semantic descriptions for geospatial data, services, and geoprocessing service chains are structured, organized, and registered in geospatial catalogue services. The ontology-based approach helps to improve the recall and precision of data and services discovery. Semantics-enabled metadata tracking and satisfaction allows analysts to focus on the generation of a geospatial process model rather than spending large amounts of time in data preparation. “DataType”-driven service composition and path planning can help to automate a range of knowledge discovery processes in a limited geospatial domain. Process planning facilitates the construction of complex services and models for geocomputation. A three-phase procedure to cover the lifecycle of service chaining and to identify the roles of the methods involved is proposed. It includes process modeling, process model instantiation, and workflow execution. The approach is implemented in a prototype system with use cases to demonstrate applicability.

The objective of the research is to develop the key technologies for an intelligent geospatial knowledge system based on Web services to automate the data discovery and data preprocessing steps in the distributed Web service environment, to automate a range of knowledge discovery processes in a limited geospatial domain, using the automated construction and execution of service chains, and to facilitate the construction of complex services and models for geocomputation.

### **From reader reviews:**

#### **Genoveva Johnson:**

The knowledge that you get from Semantic Web-based Intelligent Geospatial Web Services (SpringerBriefs in Computer Science) will be the more deep you digging the information that hide in the words the more you get thinking about reading it. It doesn't mean that this book is hard to recognise but Semantic Web-based Intelligent Geospatial Web Services (SpringerBriefs in Computer Science) giving you enjoyment feeling of reading. The author conveys their point in particular way that can be understood simply by anyone who read this because the author of this e-book is well-known enough. This particular book also makes your own personal vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We suggest you for having that Semantic Web-based Intelligent Geospatial Web Services (SpringerBriefs in Computer Science) instantly.

#### **William Bixby:**

The e-book with title Semantic Web-based Intelligent Geospatial Web Services (SpringerBriefs in Computer Science) possesses a lot of information that you can understand it. You can get a lot of gain after read this book. This specific book exist new expertise the information that exist in this guide represented the condition of the world right now. That is important to yo7u to learn how the improvement of the world. This specific book will bring you within new era of the the positive effect. You can read the e-book on your own smart phone, so you can read that anywhere you want.

#### **Dorothy Cropper:**

Many people spending their period by playing outside with friends, fun activity having family or just watching TV all day long. You can have new activity to invest your whole day by examining a book. Ugh, do you think reading a book can definitely hard because you have to take the book everywhere? It alright you can have the e-book, getting everywhere you want in your Smartphone. Like Semantic Web-based Intelligent Geospatial Web Services (SpringerBriefs in Computer Science) which is having the e-book version. So , why not try out this book? Let's see.

#### **Regina Dye:**

As we know that book is important thing to add our expertise for everything. By a e-book we can know everything we want. A book is a list of written, printed, illustrated or perhaps blank sheet. Every year ended up being exactly added. This e-book Semantic Web-based Intelligent Geospatial Web Services (SpringerBriefs in Computer Science) was filled with regards to science. Spend your free time to add your knowledge about your science competence. Some people has distinct feel when they reading any book. If you know how big benefit of a book, you can really feel enjoy to read a guide. In the modern era like currently, many ways to get book which you wanted.
