CGI Programming with Perl Scott Guelich, Shishir Gundavaram, Gunther Birznieks

Programming on the Web today can involve any of several technologies, but the Common Gateway Interface (CGI) has held its ground as the most mature method--and one of the most powerful ones--of providing dynamic web content. CGI is a generic interface for calling external programs to crunch numbers, query databases, generate customized graphics, or perform any other server-side task. There was a time when CGI was the only game in town for server-side programming; today, although we have ASP, PHP, Java servlets, and ColdFusion (among others), CGI continues to be the most ubiquitous server-side technology on the Web. CGI programs can be written in any programming language, but Perl is by far the most popular language for CGI. Initially developed over a decade ago for text processing, Perl has evolved into a powerful object-oriented language, while retaining its simplicity of use. CGI programmers appreciate Perl's text manipulation features and its CGI.pm module, which gives a well-integrated object-oriented interface to practically all CGI-related tasks. While other languages might be more elegant or more efficient, Perl is still considered the primary language for CGI. *CGI Programming with Perl*, Second Edition, offers a comprehensive explanation of using CGI to serve dynamic web content. Based on the best-selling *CGI Programming on the World Wide Web*, this edition has been completely rewritten to demonstrate current techniques available with the CGI.pm module and the latest versions of Perl. The book starts at the beginning, by explaining how CGI works, and then moves swiftly into the subtle details of developing CGI programs. Topics include:

- Incorporating JavaScript for form validation
- Controlling browser caching
- Making CGI scripts secure in Perl
- Working with databases
- Creating simple search engines
- Maintaining state between multiple sessions
- Generating graphics dynamically
- Improving performance of your CGI scripts

From reader reviews:

Richard Hood:

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to find out everything in the world. Each guide has different aim as well as goal; it means that reserve has different type. Some people experience enjoy to spend their time to read a book. They can be reading whatever they take because their hobby will be reading a book. How about the person who don't like examining a book? Sometime, individual feel need book when they found difficult problem or exercise. Well, probably you'll have this CGI Programming with Perl.

Jeffrey Thompson:

Exactly why? Because this CGI Programming with Perl is an unordinary book that the inside of the guide waiting for you to snap it but latter it will distress you with the secret it inside. Reading this book alongside it was fantastic author who all write the book in such awesome way makes the content on the inside easier to understand, entertaining method but still convey the meaning fully. So , it is good for you because of not hesitating having this ever again or you going to regret it. This book will give you a lot of rewards than the other book possess such as help improving your expertise and your critical thinking method. So , still want to hold off having that book? If I were being you I will go to the publication store hurriedly.

Georgia Lopez:

That e-book can make you to feel relax. This book CGI Programming with Perl was colorful and of course has pictures around. As we know that book CGI Programming with Perl has many kinds or variety. Start from kids until teenagers. For example Naruto or Investigation company Conan you can read and think you are the character on there. So , not at all of book are usually make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading in which.

Doreen Wolf:

A lot of guide has printed but it is unique. You can get it by online on social media. You can choose the top book for you, science, comic, novel, or whatever by means of searching from it. It is named of book CGI Programming with Perl. You can contribute your knowledge by it. Without making the printed book, it can add your knowledge and make a person happier to read. It is most significant that, you must aware about book. It can bring you from one location to other place.
