Modern Thermodynamics: From Heat Engines to Dissipative Structures

Dilip Kondepudi, Ilya Prigogine

Modern Thermodynamics: From Heat Engines to Dissipative Structures Dilip Kondepudi, Ilya Prigogine

Modern Thermodynamics: From Heat Engines to Dissipative Structures, Second Edition presents a comprehensive introduction to 20th century thermodynamics that can be applied to both equilibrium and non-equilibrium systems, unifying what was traditionally divided into 'thermodynamics' and 'kinetics' into one theory of irreversible processes.

This comprehensive text, suitable for introductory as well as advanced courses on thermodynamics, has been widely used by chemists, physicists, engineers and geologists. Fully revised and expanded, this new edition includes the following updates and features:

- Includes a completely new chapter on Principles of Statistical Thermodynamics.
- Presents new material on solar and wind energy flows and energy flows of interest to engineering.
- Covers new material on self-organization in non-equilibrium systems and the thermodynamics of small systems.
- Highlights a wide range of applications relevant to students across physical sciences and engineering courses.
- Introduces students to computational methods using updated Mathematica codes.
- Includes problem sets to help the reader understand and apply the principles introduced throughout the text.
- Solutions to exercises and supplementary lecture material provided online at <http://sites.google.com/site/modernthermodynamics/>.

Modern Thermodynamics: From Heat Engines to Dissipative Structures, Second Edition is an essential resource for undergraduate and graduate students taking a course in thermodynamics.

From reader reviews:

Orlando Hernandez:

This Modern Thermodynamics: From Heat Engines to Dissipative Structures book is not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book will be information inside this publication incredible fresh, you will get facts which is getting deeper a person read a lot of information you will get. That Modern Thermodynamics: From Heat Engines to Dissipative Structures without we understand teach the one who studying it become critical in pondering and analyzing. Don't be worry Modern Thermodynamics: From Heat Engines to Dissipative Structures can bring whenever you are and not make your tote space or bookshelves' turn out to be full because you can have it inside your lovely laptop even phone. This Modern Thermodynamics: From Heat Engines to Dissipative Structures having very good arrangement in word in addition to layout, so you will not really feel uninterested in reading.

Kina Chatman:

Modern Thermodynamics: From Heat Engines to Dissipative Structures can be one of your starter books that are good idea. We all recommend that straight away because this e-book has good vocabulary that could increase your knowledge in vocabulary, easy to understand, bit entertaining but delivering the information. The author giving his/her effort that will put every word into joy arrangement in writing Modern Thermodynamics: From Heat Engines to Dissipative Structures although doesn't forget the main point, giving the reader the hottest along with based confirm resource facts that maybe you can be one of it. This great information could drawn you into brand-new stage of crucial pondering.

Donna Salerno:

That book can make you to feel relax. This particular book Modern Thermodynamics: From Heat Engines to Dissipative Structures was colorful and of course has pictures on the website. As we know that book Modern Thermodynamics: From Heat Engines to Dissipative Structures has many kinds or style. Start from kids until teens. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore , not at all of book are make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading this.

Edna Barnett:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is created or printed or outlined from each source that will filled update of news. Within this modern era like right now, many ways to get information are available for you. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just searching for the Modern Thermodynamics: From Heat Engines to Dissipative Structures when you necessary it?
