Sherry V Nelson

The Extinction of Sivapithecus: Faunal and Environmental Changes Surrounding the Disappearance of a Miocene Hominoid in the Siwaliks of Pakistan (American School of Prehistoric Research Monographs) Sherry V Nelson

Sherry V. Nelson examines the adaptations and extinction of "Sivapithecus," a Miocene hominoid, in the Siwaliks of Pakistan. Three different studies involving dental microwear and stable isotopic analyses are interwoven to provide reconstructions of the preferred landscape, climate, and diet of "Sivapithecus" as well as changes in the environment that led to its extinction. This book presents new techniques that allow for a more detailed analysis of faunal and environmental change than ever before documented for an ape clade throughout its radiation and demise.
