Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism Susan McBride PhD RN-BC CPHIMS, Mari Tietze PhD RN-BC FHIMSS

Designed specifically for graduate-level nursing informatics courses, this is the first text to focus on using technology with an interprofessional team to improve patient care and safety. It delivers an expansive and innovative approach to devising practical methods of optimizing technology to foster quality of patient care and support population health initiatives. Based on the requirements of the DNP Essential IV Core Competency for Informatics and aligning with federal policy health initiatives, the book describes models of information technology the authors have successfully used in health IT, as well as data and analytics used in business, for-profit industry, and not-for-profit health care association settings, which they have adapted for nursing practice in order to foster optimal patient outcomes. The authors espouse a hybrid approach to teaching with a merged competency and concept-based curriculum.

With an emphasis on the benefits of an interprofessional team, the book describes the most effective approaches to health care delivery using health information technology. It describes a nursing informatics model that is comprised of three core domains: point-of-care technology, data management and analytics, and patient safety and quality. The book also includes information on point-of-care applications, population health, data management and integrity, and privacy and security. New and emerging technologies explored include genomics, nanotechnology, artificial intelligence, and data mining. Case studies and critical thinking exercises support the concept-based curriculum and facilitate out-of-the-box thinking. Supplemental materials for instructors include PowerPoint slides and a test bank. While targeted primarily for the nursing arena, the text is also of value in medicine, health information management, occupational therapy, and physical therapy.

Key Features:

- Addresses DNP Essential IV Core Competency for Informatics

Discusses newest approaches to interprofessional education for IT health care delivery

From reader reviews:

Wendy Ray: Now a day folks who Living in the era everywhere everything reachable by connect with the internet and the resources inside can be true or not call for people to be aware of each info they get. How people have to be smart in getting any information nowadays? Of course the reply is reading a book. Looking at a book can help men and women out of this uncertainty Information specially this Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism book as this book offers you rich facts and knowledge. Of course the info in this book hundred percent guarantees there is no doubt in it you may already know.

Bette Morgan: Hey guys, do you really wants to finds a new book to see? May be the book with the name Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism suitable to you? The actual book was written by famous writer in this era. The book untitled Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism is a single of several books this everyone read now. That book was inspired a number of people in the world. When you read this publication you will enter the new dimension that you ever know before. The author explained their concept in the simple way, thus all of people can easily to know the core of this reserve. This book will give you a great deal of information about this world now. To help you see the represented of the world on this book.

Henry Vance: Reading a publication can be one of a lot of action that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a book will give you a lot of new data. When you read a publication you will get new information simply because book is one of various ways to share the information or even their idea. Second, reading through a book will make anyone more imaginative. When you studying a book especially fictional book the author will bring one to imagine the story how the figures do it anything. Third, it is possible to share your knowledge to other people. When you read this Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism, you may tells your family, friends along with soon about yours publication. Your knowledge can inspire the others, make them reading a publication.

Kevin Dobson: Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism can be one of your nice books that are good idea. Many of us recommend that straight away because this guide has good vocabulary that may increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The article author giving his/her effort to set every word into pleasure arrangement in writing Nursing Informatics for the Advanced Practice Nurse: Patient Safety, Quality, Outcomes, and Interprofessionalism yet doesn't forget the main stage, giving the reader the hottest and also based confirm resource info that maybe you can be considered one of it. This great information could drawn you into brand new stage of crucial thinking.
