Heating, Cooling, Lighting: Sustainable Design Methods for Architects Norbert Lechner Sustainable environmental control through building design

Heating, Cooling, and Lighting is the industry standard text on environmental control systems with the emphasis on sustainable design. By detailing the many factors that contribute to the comfort in a building, this book helps architects minimize mechanical systems and energy usage over the life of the building by siting, building design, and landscaping to maximize natural heating, cooling, and lighting. This new fourth edition includes new information on integrated design strategies and designing for the Tropics. Resources include helpful case studies, checklists, diagrams, and a companion website featuring additional cases, an image bank, and instructor materials.

Designing buildings that require less energy to heat, cool, and light means allowing the natural energy of the sun and wind to reduce the burden on the mechanical and electrical systems. Basic design decisions regarding size, orientation, and form have a great impact on the sustainability, cost, and comfort of a building. *Heating, Cooling, and Lighting* provides detailed guidance for each phase of a design project. Readers will:

- Understand the concept of sustainability as applied to energy sources
- Review the basic principles of thermal comfort, and the critical role of climate
- Learn the fundamentals of solar responsive design, including active and passive solar systems as well as photovoltaics
- Discover how siting, architectural design, and landscaping can reduce the requirements for mechanical and electrical systems

In sustainable design, mechanical, and electrical systems should be used to only accomplish what the architect could not by the design of the building itself. With this in mind, designers require a comprehensive understanding of both the properties of energy and the human factors involved in thermal comfort. *Heating, Cooling, and Lighting* is the complete, industry-leading resource for designers interested in sustainable environmental control.

From reader reviews:

Martha Wilson:

The book Heating, Cooling, Lighting: Sustainable Design Methods for Architects can give more knowledge and also the precise product information about everything you want. Why must we leave the best thing like a book Heating, Cooling, Lighting: Sustainable Design Methods for Architects? A number of you have a different opinion about book. But one aim this book can give many facts for us. It is absolutely correct. Right now, try to closer together with your book. Knowledge or data that you take for that, you may give for each other; you can share all of these. Book Heating, Cooling, Lighting: Sustainable Design Methods for Architects has simple shape however, you know: it has great and large function for you. You can look the enormous world by open and read a book. So it is very wonderful.

Martin Phair:

Book is to be different for each and every grade. Book for children until eventually adult are different content. As you may know that book is very important usually. The book Heating, Cooling, Lighting: Sustainable Design Methods for Architects was making you to know about other knowledge and of course you can take more information. It is very advantages for you. The e-book Heating, Cooling, Lighting: Sustainable Design Methods for Architects is not only giving you much more new information but also to get your friend when you experience bored. You can spend your spend time to read your e-book. Try to make relationship with the book Heating, Cooling, Lighting: Sustainable Design Methods for Architects. You never feel lose out for everything in case you read some books.

Tasha Banda:

Do you among people who can't read pleasant if the sentence chained inside the straightway, hold on guys this specific aren't like that. This Heating, Cooling, Lighting: Sustainable Design Methods for Architects book is readable by you who hate those perfect word style. You will find the information here are arrange for enjoyable reading experience without leaving even decrease the knowledge that want to provide to you. The writer of Heating, Cooling, Lighting: Sustainable Design Methods for Architects content conveys objective easily to understand by most people. The printed and e-book are not different in the content material but it just different as it. So , do you even now thinking Heating, Cooling, Lighting: Sustainable Design Methods for Architects is not loveable to be your top checklist reading book?

Hilary Winters:

Your reading sixth sense will not betray you, why because this Heating, Cooling, Lighting: Sustainable Design Methods for Architects reserve written by well-known writer whose to say well how to make book that may be understand by anyone who read the book. Written inside good manner for you, leaking every ideas and producing skill only for eliminate your personal hunger then you still doubt Heating, Cooling, Lighting: Sustainable Design Methods for Architects as good book not merely by the cover but also by the

content. This is one guide that can break don't assess book by its include, so do you still needing an additional sixth sense to pick this specific!? Oh come on your reading through sixth sense already alerted you so why you have to listening to one more sixth sense.
