MintDuino: Building an Arduino-Compatible Breadboard Microcontroller

James Floyd Kelly, Marc de Vinck

MintDuino: Building an Arduino-Compatible Breadboard Microcontroller James Floyd Kelly, Marc de Vinck

Get started with MintDuino, the Maker Shed kit that's perfect for learning or teaching the fundamentals of how microcontrollers work. This hands-on book shows you how to build a complete MintDuino project from start to finish. Learn how to assemble the microcontroller on a breadboard (no soldering required), and immediately begin programming it.

You'll build the MintDuino Reflex Game in five separate stages or sub-tasks. Breaking down a large project into manageable tasks helps you track down errors quickly, and lets you see how each part of the circuit works. Once you complete the game, you'll have the resources and experience to tackle more MintDuino projects. If you're interested in the fascinating world of microcontrollers, you'll enjoy this book.

- Wire up and program the MintDuino to light an LED
- Build a game that tests the reflexes of two players
- Learn how to make your “game light” glow at random intervals
- Construct a pushbutton circuit to control individual players' LEDs
- Put all of the components together, including simple code to control your game

From reader reviews:

Lidia Hill:

The book MintDuino: Building an Arduino-Compatible Breadboard Microcontroller gives you the sense of being enjoy for your spare time. You need to use to make your capable more increase. Book can for being your best friend when you getting tension or having big problem along with your subject. If you can make reading a book MintDuino: Building an Arduino-Compatible Breadboard Microcontroller to become your habit, you can get a lot more advantages, like add your own capable, increase your knowledge about several or all subjects. You could know everything if you like start and read a publication MintDuino: Building an Arduino-Compatible Breadboard Microcontroller. Kinds of book are several. It means that, science guide or encyclopedia or some others. So , how do you think about this reserve?

James Anderson:

In this 21st century, people become competitive in each way. By being competitive today, people have do something to make these individuals survives, being in the middle of the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated this for a while is reading. That's why, by reading a e-book your ability to survive increase then having chance to stand up than other is high. For you who want to start reading a book, we give you that MintDuino: Building an Arduino-Compatible Breadboard Microcontroller book as beginning and daily reading guide. Why, because this book is greater than just a book.

Amy Lewis:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you may have it in e-book method, more simple and reachable. This kind of MintDuino: Building an Arduino-Compatible Breadboard Microcontroller can give you a lot of buddies because by you checking out this one book you have matter that they don't and make an individual more like an interesting person. This specific book can be one of one step for you to get success. This book offer you information that perhaps your friend doesn't learn, by knowing more than additional make you to be great individuals. So , why hesitate? Let's have MintDuino: Building an Arduino-Compatible Breadboard Microcontroller.

Diane Morgan:

Do you like reading a reserve? Confuse to looking for your best book? Or your book seemed to be rare? Why so many issue for the book? But just about any people feel that they enjoy with regard to reading. Some people likes looking at, not only science book but also novel and MintDuino: Building an Arduino-Compatible Breadboard Microcontroller or even others sources were given knowledge for you. After you know how the fantastic a book, you feel wish to read more and more. Science publication was created for teacher or maybe students especially. Those books are helping them to increase their knowledge. In some other case, beside science e-book, any other book likes MintDuino: Building an Arduino-Compatible

Breadboard Microcontroller to make your spare time a lot more colorful. Many types of book like here.
