Optimal Control of Age-structured Populations in Economy, Demography, and the Environment (Routledge Explorations in Environmental Economics)

Optimal Control of Age-structured Populations in Economy, Demography, and the Environment (Routledge Explorations in Environmental Economics)

This book covers a wide range of topics within mathematical modelling and the optimization of economic, demographic, technological and environmental phenomena. Each chapter is written by experts in their field and represents new advances in modelling theory and practice. These essays are exemplary of the fruitful interaction between theory and practice when exploring global and local changes.

The unifying theme of the book is the use of mathematical models and optimization methods to describe age-structured populations in economy, demography, technological change, and the environment. Emphasis is placed on deterministic dynamic models that take age or size structures, delay effects, and non-standard decision variables into account. In addition, the contributions deal with the age structure of assets, resources, and populations under study. Interdisciplinary modelling has enormous potential for discovering new insights in global and regional development.

Optimal Control of Age-structured Populations in Economy, Demography, and the Environment is a rich and excellent source of information on state-of-the-art modelling expertise and references. The book provides the necessary mathematical background for readers from different areas, such as applied sciences, management sciences and operations research, which helps guide the development of practical models. As well as this the book also surveys the current practice in applied modelling and looks at new research areas for a general mathematical audience. This book will be of interest primarily to researchers, postgraduate students, as well as a wider scientific community, including those focussing on the subjects of applied mathematics, environmental sciences, economics, demography, management, and operations research.

From reader reviews:

Eva Velasco:

What do you concentrate on book? It is just for students since they're still students or this for all people in the world, the actual best subject for that? Simply you can be answered for that question above. Every person has various personality and hobby for each other. Don't to be obligated someone or something that they don't desire do that. You must know how great and important the book Optimal Control of Age-structured Populations in Economy, Demography, and the Environment (Routledge Explorations in Environmental Economics). All type of book are you able to see on many sources. You can look for the internet solutions or other social media.

Sherrie Smith:

Playing with family inside a park, coming to see the water world or hanging out with buddies is thing that usually you have done when you have spare time, then why you don't try factor that really opposite from that. A single activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Optimal Control of Age-structured Populations in Economy, Demography, and the Environment (Routledge Explorations in Environmental Economics), it is possible to enjoy both. It is good combination right, you still wish to miss it? What kind of hang type is it? Oh occur its mind hangout fellas. What? Still don't get it, oh come on its identified as reading friends.

Gary Wells:

Your reading sixth sense will not betray you actually, why because this Optimal Control of Age-structured Populations in Economy, Demography, and the Environment (Routledge Explorations in Environmental Economics) reserve written by well-known writer who really knows well how to make book which might be understand by anyone who all read the book. Written throughout good manner for you, still dripping wet every ideas and publishing skill only for eliminate your hunger then you still skepticism Optimal Control of Age-structured Populations in Economy, Demography, and the Environment (Routledge Explorations in Environmental Economics) as good book but not only by the cover but also by the content. This is one guide that can break don't determine book by its deal with, so do you still needing a different sixth sense to pick this specific!? Oh come on your looking at sixth sense already said so why you have to listening to another sixth sense.

Karen Morris:

Is it anyone who having spare time and then spend it whole day by simply watching television programs or just lying down on the bed? Do you need something new? This Optimal Control of Age-structured Populations in Economy, Demography, and the Environment (Routledge Explorations in Environmental Economics) can be the reply, oh how comes? A fresh book you know. You are consequently out of date,

spending your time by reading in this completely new era is common not a nerd activity. So what these textbooks have than the others?
